PROFESSIONAL SUMMARY

ISTQB-certified QA tester with hands-on experience testing regulated iGaming platforms: verifying RNG and game integrity, reviewing compliance evidence, and running functional, regression and cross-platform tests across web and mobile. Brings a full-stack development background into test automation with Python, Selenium WebDriver and pytest, and reads the code under test rather than treating it as a black box.

SKILLS & TOOLS

Testing practice	Test case design and execution, functional and regression testing, cross-browser and cross-platform testing, defect logging and retesting, risk-based coverage analysis
Automation	Selenium WebDriver 4, pytest, Python, Page Object Model, Git and GitHub
Development	HTML, CSS, JavaScript and Python across three shipped front-end builds
Domain	iGaming compliance and certification testing across international jurisdictions (including Malta and the UK), RNG and game integrity verification
Currently learning	Java (for a Selenium/Java port of the framework), Playwright, Cypress, API test automation with pytest, JavaScript Essentials 2
Also uses	AI-assisted test case drafting and triage with prompt engineering

PROFESSIONAL EXPERIENCE

Quality Reviewer | eCOGRA

2026

Compliance testing and certification lab · multi-jurisdiction iGaming regulation

- Audits and signs off compliance test outputs before certification is issued, checking that reports and evidence meet regulatory, technical and internal quality standards.
- Reviews testing against the regulatory frameworks of multiple international gaming jurisdictions, each with its own evidentiary requirements.
- Flags gaps in test coverage and risk findings back to testers for remediation before sign-off.
- Contributes to process improvements for more accurate, consistent certification.

Test Analyst | eCOGRA

2025

Compliance testing and certification lab · online gambling systems

- Tested online gambling systems against regulatory, technical and fairness standards across web and mobile platforms.
- Verified game integrity and RNG (random number generator) behaviour, documenting results to certification-grade evidence standards.
- Designed and executed functional and regression test cases.
- Logged, tracked and retested defects through to resolution.

Desktop Support Technician | Verimark (Pty) Ltd

2024

IT support and retail rollout

- Resolved hardware and software faults across desktops, laptops, POS systems and peripherals.
- Managed the helpdesk ticket queue and provided remote user support.
- Handled IT procurement and supported new store setups and rollouts.

PROJECTS & DEVELOPMENT

Selenium + pytest Automation Framework

In progress

Self-directed · built alongside a structured self-study plan

- Building a Selenium WebDriver 4 and pytest framework around the Page Object Model, practising the same structure used in production test suites.

Selenium Book Scraper

Python · Selenium

github.com/TshepangScara/Selenium-Project

- Crawls all 50 pages (1,000 books) of books.toscrape.com: CSS-selector locators, pagination handling, NoSuchElementException to detect the last page, and UTF-8 CSV export.

Full-Stack Developer (Training) | FNB App Academy

2025

Full-stack web development training · HTML, CSS, JavaScript

- **Portfolio website:** personal site in HTML, CSS and JavaScript, hosted on GitHub Pages.
tshepangscara.github.io/portfolio-website
- **Eduzar:** front-end demo of an e-learning platform with animated scroll-reveal sections.
tshepangscara.github.io/eduzar
- **Snake game:** vanilla JavaScript recreation with movement, collision detection and scoring.
